Mahmoud Sharabati

Senior .NET Core Developer

Aleppo, Syria | +963 985 839 618 | mahmoud.sharabati.dev@gmail.com | linkedin.com/in/mahmoud-sharabati-0226b223a | mahmoudsharabati.me/Profile | gitlab.com/mahmoudsh792

SUMMARY

Senior .NET Core developer with 4+ years turning complex business domains into maintainable back ends with C#, ASP.NET Core, Clean Architecture and Domain-Driven Design (DDD), and Blazor front ends. Led the architecture of a multi-tenant warehouse and order management platform (WMS + OMS); built order, delivery and e-commerce back ends, including one operating in Saudi Arabia; and shipped the APIs behind apps on Google Play and the App Store with up to 10K+ downloads. Experienced in production ownership (99.9% uptime), third-party integrations (Stripe, Google APIs, Telegram) and mentoring engineers.

EXPERIENCE

.NET Developer, HASH Information Technology

Remote | Apr 2026 - Present

- Develop and maintain the management systems HASH builds for businesses and institutions, from new modules to production fixes.
- Design relational database schemas that model each client's business processes, with a focus on data integrity and query performance as data grows.
- Build ASP.NET Core APIs that carry business workflows and serve the systems' front ends, structured with Clean Architecture so the systems stay easy to extend.
- Keep systems healthy in production: track down bugs, tune slow queries and endpoints, and adapt features as client needs change.

.NET Developer, Evolvo

Aleppo, Syria | Nov 2025 - Present | Part-time, contract since May 2026

- Enhance and scale the back end of Wasiitak, a buy-and-sell marketplace with 10K+ downloads on Google Play (also on the App Store), and run its DevOps and data.
- Build real-time Blazor admin dashboards that keep business data actionable for clients.
- Own production readiness: server health checks, root-cause analysis from production logs, and hotfixes that hold 99.9% uptime.

.NET Backend Developer, Elkood

Aleppo, Syria | May 2022 - Apr 2024 | Full-time

- Led the architecture of Matp, a multi-tenant warehouse and order management platform (WMS + OMS) with an isolated tenant per warehouse owner; guided the team's technical decisions and mentored its developers.
- Shipped 7 products to production: built the back ends and APIs of Fly Order, Mr Course, Ads Net, Jenacom and QrGermany, and supervised development of Bronz.
- Turned complex business flows into .NET 6+ back ends on Clean Architecture and DDD with PostgreSQL and Entity Framework Core, from order and delivery lifecycles to subscriptions and payments.
- Integrated Stripe payments, Google APIs and Telegram bots so payments and notifications run without manual work.
- Built shared internal libraries that removed repeated boilerplate across projects and accelerated delivery.
- Refactored legacy code onto modern design patterns, reducing production bugs and shortening delivery.
- Mentored engineering interns through code reviews and hands-on technical workshops.

PROJECTS

Matp - Multi-tenant Warehouse & Order Management (WMS + OMS) | Elkood | ASP.NET Core, Clean Architecture, DDD, PostgreSQL

- Architecture lead. Tenant isolation, inventory, locations and zones, online merchant integrations, order and driver tracking, per-tenant authentication and roles, billing and subscriptions, push and email notifications.

Fly Order - Food & Grocery Delivery (Saudi Arabia) | Elkood | ASP.NET Core, Clean Architecture, DDD, PostgreSQL

- Order management with real-time tracking, restaurant and store management, driver and delivery management, promo codes and discounts, admin dashboard APIs, push notifications.

Mr Course - Learning Management System | Elkood | ASP.NET Core, C#

- Video courses unlocked with point-of-sale (POS) codes: code generation and redemption, video upload and storage APIs, role-based access; 5K+ downloads on Google Play.

Jenacom - Furniture Delivery Order Management | Elkood | ASP.NET Core, Clean Architecture, DDD, PostgreSQL

- Order lifecycle and delivery scheduling across multiple time zones, real-time truck driver tracking, push notifications.

30-S - Product Marketplace | Freelance | ASP.NET Core, Clean Architecture, DDD, PostgreSQL

- Built the whole back end: dynamic product attributes, search and filtering, real-time chat, 30-second product reels on a discovery feed, push notifications.

QrGermany - QR Code Platform & Marketplace | Elkood | ASP.NET Core, C#

- Customizable QR codes with dynamic attributes, a selling marketplace, scan analytics, roles and admin dashboard APIs.

Clean Architecture Template | Open source | gitlab.com/mahmoudsh792/template

- .NET solution template with domain, application, infrastructure and UI layers separated on DDD principles.

SKILLS

Languages & Frameworks: C#, .NET Core / .NET 6+, ASP.NET Core, Blazor Server, Blazor WebAssembly, MudBlazor

Architecture: Clean Architecture, Domain-Driven Design (DDD), SOLID, Design Patterns, OOP, Multi-tenant SaaS, RESTful APIs

Data: PostgreSQL, Entity Framework Core, Relational Database Design

Integrations: Stripe API, Google APIs, Telegram Bot API

DevOps & Tools: Linux, Nginx, Docker, Git, GitLab

Leadership: Technical Leadership, Mentoring, Code Reviews, Debugging, Problem Solving

EDUCATION

B.Sc. in IT Engineering, Aleppo University

Aleppo, Syria | Sep 2020 - Nov 2026 (Expected)

AWARDS & COMPETITIVE PROGRAMMING

- 11th place, 2022 ICPC Aleppo University Contest; the team qualified for the next round.
- 500+ problems solved on Codeforces (@00Mahmoud00): dynamic programming, graph theory, mathematics, data structures, greedy and implementation.

VOLUNTEERING

Volunteer Instructor, Sanad

Aleppo, Syria | Mar 2025 - May 2025

- Designed and taught a hands-on ASP.NET Core MVC course at Al-Shahba Private University: routing, controllers and actions, Razor views, model binding, and CRUD with Entity Framework Core.

Content Digitizer Volunteer, BlueBitsTeam

Aleppo, Syria | Nov 2020 - Nov 2022

- Turned professors' handwritten and spoken lectures into structured, searchable digital materials (DOCX and PDF), with quality checks for technical accuracy.
